## Profile

Experienced Senior Software Professional with a robust background spanning over 6 years in the software industry, specializing in frontend development. Proficient in crafting dynamic and engaging user interfaces.

## Experience

### SENIOR SOFTWARE ENGINEER | RTNP SOLUTIONS PVT. LTD · | JAN 2021 - PRESENT

- Led a 6-person team in the ongoing development of an in-house ecommerce initiative.
- Developed an online examination system aligned with IIT-JEE/NEET patterns, amassing a user base exceeding 200,000 on motionbhillai.com. Generated personalized PDF reports utilizing FPDF.
- Engineered a custom API to showcase targeted ads based on relative user-advertiser distances, resulting in a 25% surge in advertiser registrations.
- Created an E-Learning and institute management Web Application, enhancing educational institute operations. Contributed to a 30% boost in work efficiency and improved business conversion and retention rates by 20%.
- Tech Stack : HTML, CSS (Bootstrap), JavaScript, ReactJs, Node, Express, PHP-CodeIgniter, MySQL, NodeJS, CRON Job, Git, and GitHub.
- Soft Skills : Demonstrated leadership, problem-solving, and strategic planning abilities and effective communication skills.

### SENIOR FRONTEND DEVELOPER | ICEINFOTECH | JAN-2018 TO DEC-2021

- Created a comprehensive Web App to manage client BMI data, medical reports, and product sales showcase. Leveraged ReactJS and NodeJS to handle extensive health data. Improved data organization by 40%, managing 10,000+ BMI records and 5,000+ reports. Enhanced sales inquiries, resulting in a 25% increase in conversions within three months.
- Led UI/UX development for a job searching and posting portal, gearing for a mobile app. Managed an interface hosting 15,000+ job listings, facilitating 8,000+ successful applications in six months.
- Strategically designed for user-centricity, ensuring seamless navigation and future adaptability.
- Developed an engaging website highlighting courses, faculty, and facilities for an interior design institute. Designed with intuitive navigation, bolstering student engagement and inquiries.
- Engineered a dynamic website/web app for a construction company, enabling streamlined property administration and efficient rent service management. Enhanced operations by facilitating seamless property listings, tenant management, and rental transactions.
